(“La Jolla Shores Planned District” added 3-27-2007 by O-19587 N.S.; effective 4-26-2007.)

Division 3: Zones

(“Zones” added 3-27-2007 by O-19587 N.S.; effective 4-26-2007.)

§1510.0301 General Design Regulations

Concurrent with the adoption of the La Jolla Shores Planned District Ordinance, the City Council adopted architectural and design standards, by resolution, to be used in evaluating the appropriateness of any development for which a permit is applied under the La Jolla Shores Planned District Ordinance; such architectural and design standards shall be filed in the office of the City Clerk as a numbered document.

(a) Character of the Area

In this primarily single-family residential community, a typical home is characterized by extensive use of glass, shake or shingle overhanging roof, and a low, rambling silhouette. Patios, the atrium or enclosed courtyard, and decks facilitate the "inside-outside" orientation of life in Southern California. Spanish Mediterranean and Mexican influences are seen in the prevalent use of the arch and of terra cotta and glazed tiles. The residential and commercial structures incorporate an honest use of natural building materials and, in many instances, are characterized as a truly American style of architecture, fusing the purity and geometry of the Mexican-Spanish period with a simplicity of materials and detail with integrated landscape design.

(b) Design Principle

Within the limitations implied above, originality and diversity in architecture are encouraged. The theme "unity with variety" shall be a guiding principle. Unity without variety means simple monotony; variety by itself is chaos. No structure shall be approved which is substantially like any other structure located on an adjacent parcel. Conversely, no structure will be approved that is so different in quality, form, materials, color, and relationship as to disrupt the architectural unity of the area.

(c) Design Requirements

- (1) Building materials and color are the most critical unifying elements. For this reason, roof materials within the La Jolla Shores Planned District shall be limited to wood shakes, wood shingles, clay tile, slate or copper of good quality where the pitch is 4 in 12 or greater or other materials which would contribute to the character of the surrounding neighborhood. Roofs with a pitch of less than 4 in 12 may also be covered with crushed stone of muted dark tone.
- (2) Exterior wall materials shall be limited to wood siding, wood shingles, adobe and concrete blocks, brick, stucco, concrete or natural stone. White and natural earth colors should predominate. Primary colors may be used for accent.
- (3) To preserve the seaside character of the community each building shall be sited and designed so as to protect public views from public rights-of-way and public places and provide for see-throughs to the ocean.
- (4) Lighting which highlights architectural features of a structure shall be permitted. Such lighting shall be unobtrusive and shielded so as not to fall excessively on adjacent properties.
- (5) Appurtenances on the roof shall be enclosed or otherwise designed or shielded to be attractive.

(d) Grading Regulations

- (1) It is the intent of these regulations to preserve canyons and to prevent the cutting of steep slopes and the excessive filling to create level lots. No grading or disruption of the natural terrain shall be permitted until a permit which includes grading has been approved by the City Manager.
- (2) Grading plans may be approved if it is concluded that:
 - (A) The development will result in minimum disturbance of the natural terrain and vegetation commensurate with the proposed use of the lot or premises.
 - (B) Grading, excavation and filling proposed in connection with the development will not result in soil erosion, silting of lower slopes, slide damage, flooding problems, or excessive cutting or scarring.

- (C) The proposed development will strive to preserve and enhance the natural environment and any existing aesthetic qualities of the site.

- (3) In evaluating a development for consistency with the above required findings, the appropriate decision-maker shall utilize the provisions set forth in Land Development Code Chapter 14, Article 3, Division 1 (Environmentally Sensitive Lands Regulations).

(“General Design Regulations” added 3-27-2007 by O-19587 N.S.; effective 4-26-2007.)

§1510.0302 Permitted Use Regulations

The intent of these regulations is to preserve and enhance the environmental quality of La Jolla Shores Area as a place to live. A variety of housing types including single and multiple family units, motels and hotels supported by the necessary public facilities should be encouraged. The development of the businesses necessary to serve the residents and visitors to the area will be permitted in a compact and centrally located commercial area. Large high-rise buildings, out of scale with other structures within the community as well as automobile drive-in and drive-through establishments will be prohibited.

(“Permitted Use Regulations” added 3-27-2007 by O-19587 N.S.; effective 4-26-2007.)

§1510.0303 Single-Family Zone - Permitted Uses

In the Single-Family (SF) Zone, designated on that certain map referenced in Section 1510.0102, no building or improvement or portion thereof shall be erected, constructed, converted, established, altered, or enlarged, nor shall any premises be used except for one or more of the following uses:

- (a) One-family dwellings.
- (b) Accessory uses and buildings customarily incidental to the foregoing permitted use including the following:

- (d) Schools limited to primary, elementary, junior and senior high schools.

- (e) Churches, temples or buildings of a permanent nature, used primarily for religious purposes.
- (f) Electric distribution and gas regulating stations.
- (g) Temporary real estate sales offices and model homes in new subdivisions under the following conditions:
 - (1) Within the boundaries of a subdivision where lots are offered for sale to the public for the first time, buildings and structures erected in compliance with the provisions of the prevailing area may be used as follows: one building for a temporary real estate sales office and not more than 4 dwelling units for temporary demonstration or model home purposes. Such temporary uses shall be maintained only in conjunction with the sale or rent of land or buildings within such subdivision and such uses shall terminate 2 years after the filing in the office of the County Recorder of the final subdivision map which includes the lots on which the uses are located.
 - (2) No use authorized by the preceding paragraph shall be established closer than 200 feet from any occupied dwelling unit not in the same subdivision.

(“Single-Family Zone - Permitted Uses” added 3-27-2007 by O-19587 N.S.; effective 4-26-2007.)

§1510.0304 Single Family Zone-Development Regulations

- (a) Dwelling Unit Density Regulation

In the following Single-Family Zone, designated on that certain map referenced in Section 1510.0102 unless specified otherwise, no lot or parcel shall be developed or occupied by more dwelling units than the average dwelling unit density (units per acre) of the developed SF Zone within 300 feet of the subject lot or parcel. In no event shall any area be included in the calculation of average dwelling unit density if such area lies on the opposite side of a density calculation boundary line indicated on the map referenced in Section 1510.0102. However, in no instance shall the density exceed one unit per acre for areas which have a slope ratio of 25 percent or greater. Dwelling units that are allowed by computing density for those areas with a slope ratio of less than 25 percent may not be placed on slopes with a ratio of 25 percent or greater. In the event the subject parcel is not adjacent to or within 300 feet of subdivided and/or developed lots or parcels so that an average of dwelling unit density within 300 feet can be reasonably obtained, then said parcel shall be limited in dwelling-unit density by the regulation described in Section 1510.0304 (e)(1).

(b) Siting of Buildings

- (1) Buildings with openings (i.e., doors and/or windows) facing the side property line shall be constructed not closer than four feet from said property line, in some circumstances, provided the see-through provisions in Section 1510.0301(c) are observed.
- (2) Buildings without openings facing the side property line may be constructed on the side property line in some circumstances, provided the see-through provisions in Section 1510.0301(c) are observed and provided the drainage of storm water falling on the roof of such building is carried off on the subject property and shall in no way endanger or interfere with an abutting property, easement, or rights-of-way.
- (3) Increased yard dimensions may be required for development adjacent to a public park to avoid any detrimental impact on the park.
- (4) Building and structure setbacks shall be in general conformity with those in the vicinity.

(c) Maximum Building Height

No building or structure shall be erected, constructed, altered, moved or enlarged to a greater height than 30 feet.

(d) Maximum Lot Coverage

No building or structure shall be erected, constructed, altered, moved in or enlarged to cover more than 60 percent of the lot or parcel.

(e) Specific Tract Requirements

In the following specific areas designated on that certain map referenced in Section 1510.0102, no tract shall be occupied by more dwelling units than the number permitted below:

- (1) The dwelling unit density of Tracts A and B shall be limited to one unit for every 40,000 square feet of net land area with a slope ratio of 25 percent or greater and one unit for every 20,000 square feet net land area with a slope ratio less than 25 percent. Dwelling units that are allowed by computing density for those areas with a slope ratio of less than 25 percent may not be placed on slopes with a ratio of 25 percent or greater. Before calculating the

number of permitted dwelling units and to determine the net land area within a particular tract, the amount of area proposed for public rights-of-way, private roadways and public or commercial parking shall be deducted from the gross tract area.

- (2) Where development under a Planned Development Permit for residential development is permitted pursuant to the Land Development Code Chapter 14, Article 3, Division 4 (Planned Development Permit Regulations) no more than eight dwelling units shall be permitted on any one acre. Parking under a "cluster" concept shall be provided at a ratio of two private spaces and one public or communal space per living unit.

 - (H) Vehicular access to Torrey Pines Road shall be limited to one curb cut not to exceed 30 feet.
 - (I) In this particular tract a 45-foot-plus roof height limit may be observed to permit the preservation of trees and minimize the cutting of slopes.
